

# Installation

Model specific instructions

For:

- [Indian Chief \(All Versions\)](#)
- [Indian Chieftain \(All Versions\)](#)
- [Indian Roadmaster \(All Versions\)](#)

These instructions are a model specific add-on to the general BoosterPlug installation instructions.

## Installation Tips

- Install the BoosterPlug module as per the general installation papers.
- The picture below should help you locate the AIT sensor where the BoosterPlug is installed.
  - The AIT sensor is found in the intake manifold between the cylinder heads.
  - Remove the ignition coil assembly on the right hand side of the bike to get access to the AIT sensor.
- You have several choices for the BoosterPlug sensor location, but our favorite place is near the steering head or under the head light.
  - Just stick to the simple rules in the general installation instructions for placing the external sensor, and you'll be fine.
