

# Installation

Model specific instructions

For:

- Husqvarna NUDA 900
- Husqvarna NUDA 900R

These instructions are a model specific add-on to the general BoosterPlug installation instructions.

## Installation Tips

- Remove the fake tank cover
- Locate the AIT sensor in the Air filter box
- The pictures below should help you locate the sensor
- Install the BoosterPlug module as per the general installation papers
- You have several choices for the sensor location, but our favorite place is near the steering head or under the head light. Next to the airbox snorkel air intake hole is another very good spot
